

Table of Contents

1 Executive Summary

1.1	Introduction	1-1
1.2	Facilities.....	1-1
1.3	Capabilities	1-2
1.4	Cost & Schedule	1-2
1.5	Acquisition Strategy	1-2

2 Overview

2.1	Introduction	2-1
2.2	Technical Objectives and Mission.....	2-4
2.2.1	Design Goals	2-4
2.2.2	Shared Use of the Linac	2-4
2.3	Alternatives Analysis.....	2-5
2.3.1	Cost	2-5
2.3.2	Schedule	2-5
2.3.3	Technical	2-5
2.4	Project Schedule	2-5
2.5	Cost Estimate	2-7
2.6	Funding Requirements.....	2-7
2.6.1	R&D	2-7
2.6.2	Project Engineering Design and Construction	2-7
2.6.3	Startup	2-7
2.7	Risk Assessments and Strategies	2-8
2.7.1	Technical Risks	2-8
2.7.1.1	Performance of Photocathode Guns	2-8
2.7.1.2	Acceleration and Compression	2-8
2.7.1.3	Undulator	2-8
2.7.1.4	Wake Field Effects of the Undulator Vacuum Pipe.....	2-9
2.7.1.5	SASE FEL Physics	2-9
2.7.1.6	X-Ray Optics and Beam Handling	2-9
2.7.1.7	Conventional Facilities	2-9
2.7.2	Schedule Risks	2-10
2.7.3	Cost Risks.....	2-10
2.8	Stakeholder Input.....	2-10
2.9	Acquisition Strategy	2-10

2.10	Design Alternatives	2-12
2.11	Principle of Operation	2-12
2.12	Overall Layout.....	2-13
2.13	Performance Characteristics	2-14
2.14	The Photoinjector	2-16
2.15	Compression and Acceleration	2-16
2.16	The Undulator.....	2-16
2.17	The X-Ray Optics and Experimental Areas	2-17
2.18	Summary.....	2-17
2.19	References	2-18

3 Scientific Basis for Optical Systems

	Technical Synopsis	3-1
3.1	Introduction	3-2
	3.1.1 History of Scientific Interest in X-Ray Free Electron Lasers.....	3-2
	3.1.2 Unique Features of X-Ray FEL Radiation	3-3
	3.1.3 The Role of the LCLS	3-5
	3.1.4 Science with X-Ray FELs	3-6
3.2	Optical and Experimental Challenges.....	3-6
	3.2.1 Focusing	3-6
	3.2.2 Monochromatization	3-6
	3.2.3 Harmonic Control.....	3-7
	3.2.4 Photon Pulse Manipulation	3-7
	3.2.5 Synchronization of an External Source (Laser Pump)	3-8
	3.2.6 Detectors	3-8
	3.2.7 Summary	3-8
3.3	References	3-9

4 FEL Physics

	Technical Synopsis	4-1
4.1	Introduction	4-2
4.2	Free-electron Laser Physics.....	4-4
	4.2.1 Coherent Undulator Radiation from a Single Electron	4-4
	4.2.2 Coherent Spontaneous Radiation from Many Electrons	4-6
	4.2.3 SASE-FELs	4-7
	4.2.4 Slippage, Fluctuations and Time Structure	4-9
	4.2.5 Nonlinear Harmonic Generation	4-9
	4.2.6 Quantum Effects in Free-Electron Lasers	4-10
4.3	Experimental Results on SASE-FELs	4-11
4.4	LCLS: An X-Ray SASE-FEL.....	4-15
4.5	Effects of Spontaneous Radiation.....	4-19
4.6	Undulator Wakefields.....	4-19

4.6.1	Wakefield Theory.....	4-19
4.6.2	Wakefield Effects on the LCLS	4-20
4.7	Emittance and Charge Control.....	4-22
4.8	Control of X-Ray Pulse Length and Linewidth	4-23
4.8.1	Pulse Length Control.....	4-23
4.8.2	Linewidth Control	4-24
4.9	References	4-25

5 FEL Parameters and Performance

	Technical Synopsis	5-1
5.1	Introduction	5-2
5.2	The Basic LCLS FEL Design	5-2
5.2.1	Overview	5-2
5.2.2	Slice Parameters	5-3
5.2.3	Parameter Optimization.....	5-4
5.2.4	The Nominal Parameter Set	5-5
5.2.5	Working Points	5-6
5.3	Electron Beam Focusing Along the Undulator.....	5-7
5.3.1	Optimum Beam Size	5-7
5.3.2	Natural Undulator Focusing.....	5-9
5.3.3	Focusing Method (Lattice).....	5-10
5.3.4	FODO Lattice Layout.....	5-13
5.4	Computer Simulations	5-13
5.4.1	FEL Simulations Codes.....	5-13
5.4.2	Start-To-End Simulations.....	5-14
5.4.2.1	Case I - Low Charge Limit	5-14
5.4.2.2	Case II - High Charge Limit	5-17
5.5	Sources of Gain Reduction	5-18
5.5.1	Undulator Trajectory Errors.....	5-18
5.5.1.1	Undulator Steering and Corrector Description	5-18
5.5.1.2	Magnetic Field Errors	5-18
5.5.1.3	Undulator Trajectory Straightness Tolerances.....	5-19
5.5.1.4	Steering Stations Separations.....	5-19
5.5.1.5	Undulator Trajectory Matching Tolerances.....	5-19
5.5.2	Effects of the Emission of Spontaneous Radiation on Gain.....	5-20
5.5.2.1	Average Energy Loss.....	5-20
5.5.2.2	Energy Spread Increase	5-21
5.5.2.3	Emittance Increase	5-21
5.6	Electron Beam Tolerances.....	5-21
5.6.1	Electron Beam Tolerance Goals.....	5-21
5.6.2	Pulse-To-Pulse Intensity	5-23
5.6.2.1	Jitter at Saturation	5-23
5.6.2.2	Jitter in the Exponential Gain Regime.....	5-25

5.6.3	Control of X-Ray Power Levels.....	5-26
5.7	The Temporal Structure of the X-Ray Pulse	5-27
5.8	LCLS FEL Commissioning	5-28
5.8.1	Procedural Aspects of the FEL Gain Commissioning.....	5-28
5.9	Summary.....	5-29
5.10	References	5-29

6 Injector

	Technical Synopsis	6-1
6.1	Introduction	6-2
6.1.1	Beam Requirements	6-2
6.1.2	Emittance Compensation.....	6-4
6.1.3	Design Principles	6-5
6.2	Summary of Experimental Results	6-8
6.2.1	Quantum Efficiency	6-9
6.2.2	Transverse Emittance Measurements	6-10
6.2.2	Thermal Emittance	6-13
6.2.3	Longitudinal Emittance.....	6-14
6.3	RF Photocathode Gun.....	6-15
6.3.1	Gun Description	6-15
6.3.2	Field Strength and Cell Balance.....	6-17
6.3.3	Symmetrization	6-18
6.3.4	120 Hz Operation	6-19
6.3.5	Photocathode	6-19
6.3.6	Emittance Compensating Solenoid	6-22
6.3.7	Vacuum System.....	6-23
6.4	Laser System.....	6-24
6.4.1	System Description	6-25
6.4.2	Temporal Pulse Shaping.....	6-30
6.4.3	Fourier Relay Optics	6-31
6.4.4	Spatial Pulse Shaping.....	6-31
6.4.5	Frequency Conversion	6-31
6.4.6	Grazing Incidence	6-32
6.4.7	Stability of Laser Pulse	6-33
6.4.7.1	Pulse-to-Pulse Timing.....	6-33
6.4.7.2	Pulse Duration	6-36
6.4.7.3	Optical Energy	6-36
6.4.7.4	Spot Size and Position	6-37
6.4.8	Laser System Diagnostics	6-37
6.4.8.1	Cross-correlation Pulse Shape	6-37
6.4.8.2	Energy.....	6-38
6.4.8.3	Spatial Shape	6-38
6.4.8.4	Stability of Spot Centroid	6-39

6.4.8.5	Timing Jitter.....	6-39
6.5	Electron Beamline	6-39
6.5.1	System Description	6-39
6.5.2	Standard Beamline Diagnostic Devices	6-43
6.5.2	Slice Emittance.....	6-44
6.5.3	Temporal Pulse Shape.....	6-45
6.6	PARMELA Simulations	6-46
6.6.1	Initial Conditions.....	6-46
6.6.2	Optimization for 140 MV/m.....	6-50
6.6.3	Optimization for 120 MV/m.....	6-59
6.6.4	Sensitivity Study	6-63
6.7	References	6-67

7 Accelerator

	Technical Synopsis	7-1
7.1	Introduction and Overview.....	7-2
7.2	Longitudinal Beam Dynamics	7-4
7.2.1	Bunch Compression Overview.....	7-4
7.2.2	Design Optimization Technique.....	7-7
7.2.3	X-Band RF Compensation	7-8
7.2.4	Nominal Parameters	7-11
7.2.5	Longitudinal Tracking Summary	7-13
7.2.6	Beam Jitter Sensitivities	7-17
7.2.7	Energy Management and Overhead	7-21
7.2.8	Alternate Parameters	7-21
7.2.8.1	Variable Bunch Charge.....	7-21
7.2.8.2	Electron Chirp to Facilitate X-Ray Pulse Compression.....	7-23
7.2.8.3	Long Wavelength SASE Radiation	7-25
7.3	Transverse Beam Dynamics	7-27
7.3.1	The L0-Linac.....	7-28
7.3.2	The L1-Linac.....	7-28
7.3.3	The L2-Linac.....	7-30
7.3.4	The L3-Linac.....	7-32
7.4	Electron Bunch Compressors	7-34
7.4.1	First Bunch Compressor.....	7-34
7.4.1.1	Overview and Parameters	7-35
7.4.1.2	Momentum Compaction	7-36
7.4.1.3	Coherent Synchrotron Radiation (CSR)	7-37
7.4.1.4	Beam Size, Aperture, and Field Quality	7-41
7.4.1.5	Tuning and Correction	7-42
7.4.2	Second Bunch Compressor	7-43
7.4.2.1	Overview and Parameters	7-45
7.4.2.2	Momentum Compaction	7-47

	7.4.2.3	Incoherent Synchrotron Radiation (ISR)	7-47
	7.4.2.4	Coherent Synchrotron Radiation (CSR)	7-48
	7.4.2.5	Resistive Wall Longitudinal Wakefields in the Bends	7-51
	7.4.2.6	Beam Size, Aperture and Field Quality	7-52
	7.4.2.7	Tuning and Correction	7-53
7.5		Beam Transport Lines.....	7-54
	7.5.1	Low-Energy Dog-Leg	7-54
	7.5.1.1	Layout	7-55
	7.5.1.2	Parameters.....	7-56
	7.5.1.3	Coherent Synchrotron Radiation	7-57
	7.5.1.4	Beam Size, Aperture, and Field Quality	7-58
	7.5.1.5	Tuning and Correction	7-59
	7.5.2	High-Energy Dog-Leg	7-60
	7.5.2.1	Parameters.....	7-61
	7.5.2.2	Coherent Synchrotron Radiation	7-62
	7.5.2.3	Beam Size, Aperture, and Field Quality	7-65
	7.5.2.4	Tuning and Correction	7-66
	7.5.3	Dumpline.....	7-66
	7.5.3.1	Beam Containment and Beam Dump.....	7-68
	7.5.3.2	Vacuum Chambers.....	7-69
7.6		Six-Dimensional Particle Tracking Studies.....	7-70
	7.6.1	Electron Beam Evaluation.....	7-70
	7.6.2	FEL Gain Estimation.....	7-74
	7.6.3	Beam Jitter Simulations.....	7-75
7.7		Radio Frequency Systems.....	7-78
	7.7.1	RF Distribution in the Injector and Linac	7-79
	7.7.2	Layout and Performance of the Present SLAC Linac RF	7-81
	7.7.3	Improvements to the RF System	7-85
	7.7.3.1	Sub-boosters	7-85
	7.7.3.2	Phase and Amplitude Control Units	7-85
	7.7.3.3	Master Oscillator.....	7-86
	7.7.3.4	Timing System.....	7-87
	7.7.3.5	Synchronization Pulses for Experiments	7-88
	7.7.3.6	Beam Diagnostics	7-88
	7.7.3.7	Reliability.....	7-88
7.8		Instrumentation, Diagnostics, and Feedback	7-88
	7.8.1	Transverse Emittance Diagnostics	7-89
	7.8.1.1	ED0 Emittance Station.....	7-90
	7.8.1.2	ED1 Emittance Station.....	7-91
	7.8.1.3	L2-ED Emittance Station.....	7-91
	7.8.1.4	L3-ED Emittance Station.....	7-91
	7.8.1.5	ED2 Emittance Station.....	7-91
	7.8.2	Bunch Length Diagnostics	7-92
	7.8.2.1	Transverse RF Deflector.....	7-92

7.8.2.2	RF Zero-Phasing Technique	7-97
7.8.2.3	Electo-Optical Bunch Length Diagnostic	7-98
7.8.3	Beam Energy Spread Diagnostics	7-100
7.8.3.1	DL1 Energy Spread Diagnostics.....	7-100
7.8.3.2	BC1 Energy Spread Diagnostics.....	7-100
7.8.3.3	BC2 Energy Spread Diagnostics.....	7-100
7.8.3.4	DL2 Energy Spread Diagnostics.....	7-100
7.8.4	Trajectory and Energy Monitors with Feedback Systems.....	7-101
7.8.4.1	Trajectory Feedback Systems	7-101
7.8.4.2	Energy Feedback Systems	7-101
7.9	The Wake Functions for the SLAC Linac	7-103
7.9.1	Introduction	7-103
7.9.2	The Calculated Wakefields for the SLAC Linac.....	7-103
7.9.3	Discussion	7-106
7.9.4	Confirmations.....	7-107
7.9.5	Resistive Wall Wakefields	7-107
7.10	Parts List and Installation Issues.....	7-109
7.10.1	Parts List.....	7-109
7.10.2	Installation Issues	7-111
7.11	Operational Issues.....	7-112
7.12	References	7-113

8 Undulator

	Technical Synopsis	8-1
8.1	Overview	8-2
8.1.1	Introduction.....	8-2
8.1.2	Undulator Line Design Summary.....	8-3
8.2	Theory and Tolerances for the Undulator.....	8-4
8.2.1	Design of Undulator Segments	8-4
8.2.1.1	Basic Considerations.....	8-4
8.2.2	Optimal Period and Focusing.....	8-4
8.2.3	Irregularities and Imperfections	8-7
8.2.4	Tolerances for Undulator Segments.....	8-8
8.2.5	Derivation of the Tolerances for the X-Ray FEL.....	8-9
8.2.5.1	Derivation of Basic Equations	8-9
8.2.5.2	Trajectory Straightness	8-11
8.2.5.3	Phase Errors	8-12
8.2.5.4	Resulting Power Gain Length Increase.....	8-14
8.3	Undulator Measurement and Tuning	8-14
8.3.1	Requirements for the LCLS	8-14
8.3.2	APS Magnetic Measurement Facility.....	8-15
8.3.3	Requirements for Measurement Facility on LCLS Site	8-16
8.4	Measurement and Sorting of Magnet Blocks	8-16

8.4.1	Characterization of Magnet Blocks with Helmholtz Coils.....	8-16
8.4.2	Characterization of Magnet Blocks with Half-Period Fixture	8-18
8.4.3	LCLS Prototype Undulator Segment	8-20
8.5	Magnetic Design for the Undulator	8-20
8.5.1	Choice of Magnet Material	8-20
8.5.2	Undulator Magnetic Model	8-22
8.5.2.1	Two-Dimensional Model.....	8-22
8.5.2.2	Three-Dimensional Model.....	8-24
8.5.3	Undulator Segment Ends.....	8-27
8.6	Mechanical Design	8-27
8.6.1	Design of Magnetic Structure	8-27
8.6.2	Provisions for Magnetic Tuning.....	8-33
8.6.3	Undulator Supports and Movers	8-36
8.6.4	Thermal Considerations	8-37
8.7	Permanent Magnet Quadrupoles.....	8-37
8.7.1	Quadrupole Mechanical Design.....	8-38
8.8	Vacuum Chamber	8-39
8.8.1	Electron Beam Collimation and Vacuum Chamber Design.....	8-40
8.8.1.1	Beam Parameters Used in These Calculations.....	8-40
8.8.1.2	Permanent Magnet Material.....	8-40
8.8.1.3	Undulator Vacuum Chamber.....	8-42
8.8.1.4	Beam Strikes at the Entrance to the Vacuum Chamber	8-42
8.8.1.5	Beam Strikes Inside the Undulator	8-43
8.8.1.6	Adjustable Collimators to Protect Undulator and Vacuum Chamber ..	8-45
8.8.1.7	Fixed Aperture Protection Collimators.....	8-46
8.8.1.8	Vacuum Chamber Surface Roughness.....	8-46
8.8.2	Vacuum System Requirements and Description	8-47
8.8.3	Gas Load and Vacuum Pressure.....	8-49
8.8.4	Thermal Considerations	8-52
8.9	Wakefield Effects in the Undulator	8-52
8.9.1	Introduction.....	8-52
8.9.2	Wakefield Induced Beam Degradation	8-53
8.9.3	The Resistive Wall Wakefields.....	8-54
8.9.4	The Effect of Flange Gaps, Pumping Slots, and Bellows	8-56
8.9.5	The Effect of Wall Surface Roughness.....	8-57
8.10	Ion Effects	8-62
8.10.1	Introduction.....	8-62
8.10.2	Ionization Processes	8-62
8.10.2.1	Ionization by the beam.....	8-62
8.10.2.2	Ionization by incoherent synchrotron radiation.	8-62
8.10.2.3	Tunneling ionization in the coherent laser field.	8-63
8.10.3	Emittance Dilution	8-64
8.10.4	Conclusion.....	8-65
8.11	Electron Beam Diagnostics.....	8-65

8.11.1	Performance Requirements	8-65
8.11.2	Overview	8-65
8.11.3	Undulator Beam Position Monitors.....	8-66
8.11.4	Undulator Optical Transition Radiation (OTR) Electron-Beam Profile Monitors.....	8-68
8.11.5	Cherenkov Detectors.....	8-71
8.11.6	Current Monitoring Toroids	8-71
8.12	Beam-based Alignment	8-72
8.12.1	Undulator Beam-Based Alignment	8-72
8.12.1.1	Introduction.....	8-72
8.12.1.2	Simulation Results	8-75
8.12.1.3	Sensitivities.....	8-86
8.12.1.4	Long Term Stability.....	8-87
8.12.1.5	Summary.....	8-88
8.13	X-Ray Diagnostics.....	8-88
8.13.1	Introduction.....	8-88
8.13.2	Undulator Cell Structure	8-88
8.13.3	X-Ray Diagnostics Specifications and Experimental Set-up	8-89
8.13.4	On-Axis X-Ray Diagnostics.....	8-90
8.13.5	Off-Axis X-Ray Diagnostics.....	8-93
8.13.6	Effects of the Electron Beam Emittance	8-94
8.14	References	8-99

9 X-Ray Beam Transport and Diagnostics

	Technical Synopsis	9-1
9.1	Introduction	9-1
9.1.1	Objectives.....	9-1
9.1.2	General Considerations	9-2
9.1.2.1	Beam Characteristics	9-2
9.1.2.2	Photon-Induced Damage.....	9-3
9.2	Layout and Optics.....	9-6
9.2.1	Experimental Halls.....	9-6
9.2.2	Optical Enclosures	9-7
9.2.2.1	Front End Enclosure	9-7
9.2.2.2	Hutch A1.....	9-14
9.2.2.3	Hutch A2.....	9-16
9.2.2.4	Hutch A4.....	9-20
9.2.2.5	Inter-Hall Transport	9-20
9.2.2.6	Hutch B1.....	9-20
9.2.2.7	Hutch B2.....	9-21
9.2.2.8	Hutch B4.....	9-23
9.3	Mechanical and Vacuum	9-23
9.4	Diagnostics	9-24
9.4.1	Diagnostics Layout.....	9-24

9.4.2	Facility Diagnostics Instruments	9-25
9.4.2.1	Direct Scintillation Imager.....	9-25
9.4.2.2	Scattering Foil Imager	9-26
9.4.2.3	Micro-Strip Ion Chamber.....	9-27
9.4.2.4	Facility Diagnostic Tanks	9-28
9.4.2.5	Ion Chamber Gas Mixing and Distribution System.....	9-29
9.4.3	Commissioning Diagnostics.....	9-30
9.4.3.1	Total Energy	9-30
9.4.3.2	Pulse Length	9-31
9.4.3.3	Photon Spectrum.....	9-32
9.4.3.4	Transverse Coherence.....	9-32
9.4.3.5	Spatial Shape and Centroid Location.....	9-33
9.4.3.6	Divergence.....	9-33
9.4.4	Diagnostics Modeling	9-33
9.5	References	9-34

10 Conventional Facilities

	Technical Synopsis	10-1
10.1	Injector Housing	10-2
10.2	Linac Housing.....	10-4
10.3	Undulator Hall	10-4
10.4	Experimental Halls	10-4
	10.4.1 Near Experimental Hall.....	10-5
	10.4.2 Far Experimental Hall	10-7
10.5	Beam Tunnel.....	10-10

11 Controls

	Technical Synopsis	11-1
11.1	Control System	11-2
11.2	Injector Controls	11-4
11.3	Accelerator Controls.....	11-4
11.4	Undulator Control.....	11-5
	11.4.1 Movers	11-5
	11.4.2 Undulator Diagnostics.....	11-5
11.5	X-Ray Beam Line Electronics and Controls.....	11-5
	11.5.1 Control System Objectives.....	11-6
	11.5.2 Control System Layout.....	11-6
	11.5.3 Motion Controls	11-6
	11.5.4 Feedback Systems	11-7
	11.5.5 Timing System	11-7
11.6	Radiation Safety and Protection Systems	11-7
	11.6.1 Radiation Safety Systems - Control System.....	11-8

11.6.2	Radiation Safety and Protection Systems Description	11-8
11.7	Machine Protection System	11-10

12 Alignment

Technical Synopsis	12-1
12.1 Procedural Overview	12-1
12.2 LCLS Surveying Reference Frame	12-2
12.2.1 Network Design Philosophy	12-3
12.2.2 Network Layout	12-5
12.2.2.1 Injector Network	12-5
12.2.2.2 Linac Network	12-5
12.2.2.3 Undulator Hall Network	12-5
12.2.2.4 Transport Line/Experimental Area Networks	12-8
12.2.3 Alignment Coordinate System	12-9
12.2.4 Tunnel Network Survey	12-9
12.2.5 Surface Network	12-11
12.2.6 Data Analysis and Data-Flow	12-11
12.3 Layout Description Reference Frame	12-12
12.3.1 Lattice Coordinate System	12-12
12.3.2 Tolerance Lists	12-12
12.3.3 Relationship Between Coordinate Systems	12-12
12.4 Fiducializing LCLS Magnets	12-13
12.5 Absolute Positioning of Components	12-13
12.5.1 Undulator Absolute Positioning	12-13
12.5.2 Injector, Transport Line and Experimental Area Absolute Positioning	12-14
12.5.3 Quality Control	12-14
12.6 Relative Alignment	12-14
12.6.1 Relative Undulator Alignment	12-14
12.6.1.1 Introduction	12-14
12.6.1.2 Relative Quadrupole Positioning	12-14
12.6.1.3 Undulator Alignment	12-15
12.6.1.4 Quality Control	12-15
12.6.2 Linac Smoothing	12-15
12.6.2.1 Purpose of Linac Smoothing	12-15
12.6.2.2 Linac Straightness Measurement Procedure	12-15
12.6.3 Relative Alignment of Transport Line and Experimental Area Components	12-16
12.7 Undulator Monitoring System	12-16
12.8 References	12-19

13 Environment, Safety, and Health and QA

13.1	Ionizing Radiation	13-5
------	--------------------------	------

13.1.1	Radiation Shielding.....	13-5
13.1.2	Personnel Protection System.....	13-5
13.1.3	Beam Containment System.....	13-6
13.1.4	Radiation Safety Training.....	13-6
13.2	Electrical Safety.....	13-8
13.3	Non-Ionizing Radiation.....	13-8
13.4	Emergency Preparedness.....	13-9
13.4.1	Seismic Safety.....	13-9
13.4.2	Emergency Planning.....	13-9
13.5	Construction Safety.....	13-9
13.5.1	General.....	13-9
13.5.2	Tunnel.....	13-10
13.6	Hazardous Materials.....	13-10
13.7	Fire Safety.....	13-11
13.8	Environmental Protection.....	13-12
13.9	Quality Assurance.....	13-13
13.10	SLAC References.....	13-15

14 Radiological Considerations

	Technical Synopsis.....	14-1
14.1	Introduction.....	14-1
14.2	Radiation Sources.....	14-2
14.2.1	Beam Parameters.....	14-2
14.2.2	Bremsstrahlung from Collimators.....	14-2
14.2.3	Bremsstrahlung from On-Axis Diagnostic X-Ray Stations.....	14-5
14.2.4	Synchrotron Radiation.....	14-5
14.2.5	Electron Deam Dump.....	14-5
14.2.6	Gas Bremsstrahlung.....	14-7
14.2.7	Muons.....	14-7
14.2.8	Neutrons.....	14-8
14.3	Radiation Safety System.....	14-8
14.3.1	Minimum Shielding Requirements.....	14-12
14.3.2	Beam Containment System.....	14-13
14.3.3	Personnel Protection System (PPS) and Hutch Protection System (HPS).....	14-14
14.3.3.1	Stoppers.....	14-15
14.3.3.2	Burn-Through Monitors.....	14-15
14.4	Induced Activity.....	14-15
14.5	References.....	14-16

15 Work Breakdown Structure

	Technical Synopsis.....	15-1
15.1	Level 3 Work Breakdown Structure.....	15-1

A Parameter Tables

A.1	FEL-Physics.....	A-1
A.1.1	Performance	A-1
A.1.1.1	Electron Beam.....	A-1
A.1.1.2	Spontaneous Radiation	A-1
A.1.1.3	FEL	A-2
A.2	Photo-Injector.....	A-3
A.2.1	Gun-Laser.....	A-3
A.2.1.1	Subsystem.....	A-3
A.2.2	Gun.....	A-4
A.2.2.1	Subsystem.....	A-4
A.2.2.2	Solenoid	A-4
A.2.3	L-0.....	A-4
A.2.3.1	Subsystem.....	A-4
A.2.3.2	Electron Beam.....	A-5
A.2.3.3	Focusing.....	A-5
A.2.3.4	RF	A-5
A.2.4	DL-1	A-5
A.2.4.1	Subsystem.....	A-5
A.2.4.2	Electron Beam.....	A-6
A.2.4.3	Focusing.....	A-6
A.2.4.4	Quadrupole Magnets.....	A-6
A.2.4.5	Dipole Magnets.....	A-6
A.2.4.6	Diagnostics	A-6
A.2.4.7	Vacuum.....	A-7
A.3	LINAC.....	A-8
A.3.1	General.....	A-8
A.3.1.1	S-Band Accelerator Section.....	A-8
A.3.1.2	X-Band Accelerator Section.....	A-8
A.3.2	L-1	A-8
A.3.2.1	Subsystem.....	A-8
A.3.2.2	Electron Beam.....	A-9
A.3.2.3	Focusing.....	A-9
A.3.2.4	RF	A-9
A.3.3	L-X.....	A-9
A.3.3.1	Subsystem.....	A-9
A.3.3.2	Electron Beam.....	A-10
A.3.3.3	RF	A-10
A.3.4	BC-1	A-10
A.3.4.1	Subsystem.....	A-10
A.3.4.2	Electron Beam.....	A-11
A.3.4.3	Dipole Magnet	A-11

A.3.4.4	Diagnostics	A-11
A.3.5	L-2	A-11
A.3.5.1	Subsystem	A-11
A.3.5.2	Electron Beam.....	A-12
A.3.5.3	Focusing.....	A-12
A.3.5.4	RF	A-12
A.3.6	BC-2	A-12
A.3.6.1	Subsystem	A-12
A.3.6.2	Electron Beam.....	A-13
A.3.6.3	Dipole Magnet	A-13
A.3.6.4	Diagnostics	A-13
A.3.7	L-3	A-13
A.3.7.1	Subsystem	A-13
A.3.7.2	Electron Beam.....	A-14
A.3.7.3	Focusing.....	A-14
A.3.7.4	RF	A-14
A.3.8	DL-2	A-15
A.3.8.1	Subsystem	A-15
A.3.8.2	Electron Beam.....	A-15
A.3.9	DL-2	A-15
A.3.9.1	Quadrupole Magnet	A-15
A.3.9.2	Diagnostics	A-16
A.3.9.3	Collimators.....	A-16
A.3.10	Beam-Dump	A-16
A.3.10.1	Subsystem	A-16
A.3.10.2	Electron Beam.....	A-16
A.3.10.3	Dipole Magnets.....	A-16
A.4	Undulator	A-17
A.4.1	Undulator	A-17
A.4.1.1	Undulator Magnet	A-17
A.4.1.2	Electron Beam Optics	A-18
A.4.1.3	Electron Trajectory Correction	A-19
A.4.1.4	Beam-Based-Alignment.....	A-19
A.4.1.5	Electron Beam at Entrance.....	A-19
A.4.1.6	Electron Beam inside Undulator	A-20
A.4.1.7	Vacuum System	A-20
A.4.1.8	Radiation Damage.....	A-20
A.4.1.9	Temperature Stability.....	A-20
A.4.1.10	Static Electron Beam Tolerances	A-21
A.4.1.11	Pulse-to-Pulse Electron Beam Tolerances	A-21
A.4.1.12	Undulator Tolerances.....	A-22
A.4.1.13	Segment Alignment Tolerances	A-23
A.4.1.14	Quadrupole Alignment Tolerances	A-23
A.4.1.15	BPM Alignment Tolerances	A-23

A.5	X-Ray-Optics.....	A-24
A.5.1	Radiation-Source.....	A-24
A.5.1.1	FEL Radiation.....	A-24
A.5.1.2	Spontaneous Radiation	A-24

B Control Points

B.1	Injector Control Points.....	B-1
B.2	Accelerator Control Points – New Devices	B-2
B.3	Undulator Control Points.....	B-3
B.4	X-Ray Optics Control Points	B-4
