ROOM DATA SHEETS

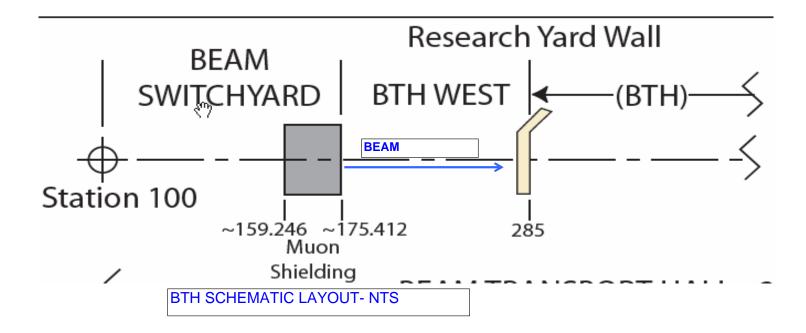

System & WBS Manager: Dave Schultz/Jose Chan

FACILITY COMPONENT	BEAM TRANSPORT HALL WEST - ROOM DATA SHEET							
	Name of Building		LCLS Bea	am Transport Hall West (BTH west)				
	Organization or Departmen	t		SLAC, Stanford University				
	Net area		555.0	· · · · · · · · · · · · · · · · · · ·				
	Critical dimensions		H:	3.05m (finish floor to ceiling)	10'-0"			
			W:	4.5m (interior wall to interior wall)	14'-9"			
			L:	123.75 m	412'-6"			
		Hours of operation		Facility is locked 24/7/365 (periodic maintenance only)				
	Users/Occupancy			ancy during normal operation of the fac				
				p to 20 persons-Restricted access beg				
				aze exit. FHA requires a safety watch-l	Refer to FHA,			
			LCLS PM	LCLS PMD1.1-027				
			Located in	n the existing Beam Switch Yard (BSY)				
FUNCTIONAL OBJECTIVE		the Muon Wall to the Headwall of the and floor act as barrier for radiation er		d. Its purpose is to carry the high-enero	y electron beam			
DI ANNINO CONOIDED LEGICO CONTROL	Floor level in 11 d 11 d 11	This facility area	- M/-II	well Evision DTIIW 17 W				
PLANNING CONSIDERATIONS & CRITICAL	Floor level is existing to remain future beam lines and shielding		n vvall vertical v	wall. Existing BTH West facility meets	criteria to house			
FACTORS	•	-to be filled with appropriate steel rod	length 12 ft (Sn	pecified by Radiation Physics)				
	b) North hole to research yard-	6-1/4 inch 15 foot long pipe to be fille	ed with concrete		elow in "Finishes".			
	-,		g					
FINISHES	Walls	Reinforced concrete- Existing	Reinforced concrete- Existing to remain-					
	Ceiling	Existing reinforced removable	concrete blocks	s to remain				
	Floor	1) Construct a concrete base 0" x 6-0"L) 2) Provide metal grating over 3) Delete ramp and railing bet S9205.	Provide metal grating over the open areas around the concrete base. Delete ramp and railing between BTH and BTH west as shown on drawing \$2208 and drawing \$2208.					
	Base	None						
	Doors		and existing emergency door into BSY area. See section 6.5 FHA					
	Fenestrations	None						
	Acoustical/Thermal	None						
APPLICABLE STANDARDS	Constructions Dept of Labor, L Mechanical Code (UMC) inclu appendixes, California Code of Safety Code ANSI C2, Occupa	Iniform Building Code (UBC) 1997 ind ding appendixes, Uniform Plumbing (f Regulations Title 8 Industrial Safety, titional Safety and Health Act (OSHA), Manual, General Industrial Activities	luding appendix Code (UPC) incl Title 19 Public Environmental Storm Water Pe	R Part 1926 Safety and Health Regula xes, National Electric Code (NEC) 2007 uding appendixes, Uniform Fire Code Safety, NFPA 70 National Fire Codes, I Protection Agency 40 CFR Parts 264 ermit (SLAC Permit), NFPA 101 life Sa	2, Uniform UFC) including National electrical and 265, SLAC fety Code, Title 24
